Abstract

The effect of a training program based on Self-Instruction on the Fifth grade students achievements in Arabic language

Mohammad. Ahmad. A. alzu'bi,

Mu'tah University. 2006

This study aimed to find out the effect of training program based on self-instruction strategy on the development of fifth grade students academic Achievement in Arabic language; in other words this study attempted to answer the following question: What is the influence of this training program in the achievement of the fifth grade students in Arabic language?

The sample of the study consisted of (79) of the fifth grade male students in Faisal I basic school in Aqaba has been choosing randomly, into two groups. the control group which consisted of (40) students, and the experimental group (39) students and also these tow groups choosed in the seam way (randomly). the study was based on the self-instruction strategy and it was composed of (18) session in learning situation which were applied on the experimental study sample during the second semester for the academic year 2005/2006. The results of final exam of the first semester were used as a pretest. An achievement exam for each new unit was applied on both groups (the control group and the experimental).

The result revealed that there are statistically significant differences in favor of the experimental group. Accordingly some recommendations were discussed.
